

Authors

Carmelo F. Aliotta

Served two years in Naval Aviation V-S program; now attending Marist College, Poughkeepsie, N. Y. Worked in electron microscopy at Texaco Research Laboratory, Beacon, N. Y. In 1956 joined IBM Research in Poughkeepsie as technician in the Magnetics Department. Is now doing electron microscope service work at the Thomas J. Watson Research Laboratory. Is member of the Electron Microscope Society of America and the New York Society of Electron Microscopists.

Edward J. Barlow

B.S. in Mechanical Engineering, 1955; M.S. in Applied Mechanics, 1956, Stanford University. Graduate student associate 1960 at San Jose Research Laboratory. Now graduate student at Stanford University in Engineering Mechanics and consultant to Ampex Research Laboratory, Redwood City, California.

Geoffrey Bate

B.Sc., 1949, Ph.D. in Physics, 1952, University of Sheffield, England. Worked in Royal Navy Scientific Service on infrared photoconductors from 1952-1956. Research Associate 1956-1957, Assistant Professor 1957-1959, Physics Department, University of British Columbia. Joined IBM in 1959, and is now Advisory Physicist in the Data Systems Division, Poughkeepsie. Dr. Bate is studying the magnetic properties of recording surfaces.

Sidney A. Bernhard

B.S., 1948, Brooklyn College; M.S., 1949, Pennsylvania State College. Fellow, 1950-1951, Columbia; Ph.D. in Physical Chemistry, 1951. Assistant in physical and organic chemistry, Columbia, 1949-1950; research associate, 1951. Fellow, American Cancer Society, 1951-1953, California Institute of Technology, Cambridge, 1953-1954. Dr. Bernhard is presently pursuing the study of the function of protein at the Institute of Molecular Biology, University of Oregon, Eugene, Oregon. Member, American Chemical Society and Faraday Society.

Raymond E. Bonner

B.E.E., Manhattan College, 1954; M.E., 1955, and D. Eng., Yale University, 1957. Joined IBM in 1957 and is presently working on pattern recognition in the Advanced Systems Development Division, Yorktown Heights, N. Y. Member of Sigma Xi, Eta Kappa Nu, and is a licensed Professional Engineer in the State of New York.

Norman Braslau

B.S., 1951, Texas A. & M. College; M.S., 1952, Ohio State University; Ph.D. in Physics, 1960, University of California, Berkeley. Physicist, Air Force Cambridge Research Center, 1952-1955 during tour of active duty, USAF; Staff Member, Lawrence Radiation Laboratory, Berkeley, 1960; Visiting Fellow in the laboratory of Prof. A. Kastler, Ecole Normale Supérieure, Paris, under a grant from the Office of Naval Research, 1960-1961. Joined IBM in 1961 at the Thomas J. Watson Research Center. Is now engaged in research on optical masers and nonlinear optical effects. Member of American Physical Society and Sigma Xi.

Geoffrey E. Brock

B.Sc., University of Wales, 1950; M.S., 1952, Ph.D. in Metallurgy, 1954, Pennsylvania State University. Fulbright Scholar to Pennsylvania State University, 1950. Worked at Frankfort Arsenal 1954-1956 as physical metallurgist. Joined IBM Research in 1956. Presently engaged in the growth and metallurgical study of semiconductor single crystals at the Thomas J. Watson Research Center, Yorktown Heights, N. Y. Member of ASM and AIME. Member of Electronic Materials Committee of AIME.

John W. Brookman

In 1957, technician, working on the development of high-speed decade scalars at the Beckman Instrument Company. Joined IBM in 1957. Now at Advanced Systems Development Division at San Jose working as technician in phosphor research and light-beam communication.

Lowell S. Brown

A.B. in Physics, 1956, University of California, Berkeley; A.M. in Physics, 1958, and Ph.D. in Physics, 1961, Harvard University, Cambridge. In 1958, worked at the MIT Lincoln Laboratories in theoretical physics. In 1959, worked in theoretical physics at the IBM Research Laboratory at San Jose. Now at the University of Rome. Member of Sigma Xi and Phi Beta Kappa.

Wolfgang Dietrich

Diploma in Electrical Engineering, Institute of Technology, Darmstadt, Germany, 1952. From 1952 to 1956 he participated in the construction of the electronic computer DERA at the Institute of Applied Mathematics, Darmstadt. Joined IBM in 1956 as an Associate Engineer in the Research Laboratory, Zurich, where he is engaged in investigating the switching properties of thin magnetic films. Member of the German Nachrichtentechnische Gesellschaft (NTG).

William L. Duda

Ph.D., Yale University, 1956. Joined IBM, 1955, at the Poughkeepsie Laboratory, working in the areas of logic, machine intelligence, biochemistry and medicine. Is presently engaged in a program of applying logic to biochemistry and medicine at the Thomas J. Watson Research Center. Is member of Phi Beta Kappa and the Association for Symbolic Logic.

Theodore L. Gardner

B.S. in Physics, 1954, Purdue University. From 1954-1956, Guidance Systems Officer in the U.S. Air Force. From 1956 to present, senior associate programmer at the IBM Federal Systems Division Laboratory at Kingston. Currently writing computer programs for processing of TIROS Satellite Photographs.

William E. Langlois

Sc.B. in Physics, 1953, Notre Dame. Ph.D. in Applied Mathematics, 1957, Brown University. From 1956-1959, research engineer at the Polychemicals Department, E. I. duPont de Nemours & Company, concentrating on hydrodynamics of non-Newtonian fluids. Joined IBM in 1959 and is now studying lubrication theory at the IBM Research Laboratory at San Jose.

Ronald E. MacDonald

Ph.D., 1957, University of Toronto. From 1957-1959, Bell Telephone Laboratories, concentrating on semiconductor device development. Assistant Professor, Physics Department, Essex College, Windsor, Ontario, 1959-1960. Since 1960, staff physicist at Advanced Systems Development Division at San Jose, working in photophysics. Member of the American Physical Society.

Richard E. Mach

M.E. in Mechanical Engineering, Stevens Institute of Technology, 1955. Joined IBM at the Federal Systems Division Laboratory at Kingston; worked on design of SAGE computer system. Now project leader for IBM Weather Satellite Image Processing Study. Member of Tau Beta Pi.

Sheldon H. Moll

S.B. in 1955; S.M. 1956; Ph.D. in Metallurgy, 1959, Massachusetts Institute of Technology. Dr. Moll is Laboratory Director of Advanced Metals Research Corporation, Somerville, Massachusetts. Engaged in consulting and research in physical metallurgy, electron beam microanalysis, electron microscopy and x-ray analysis. Is member of Tau Beta Pi, Sigma Xi, Phi Lambda Upsilon, and AIME.

Marshall I. Nathan

B.S. in Physics, Massachusetts Institute of Technology, 1954; M.A. in Physics, 1956; Ph.D. in Applied Physics,

1958, Harvard University. Joined IBM in 1958 and is engaged in semiconductor research at the Thomas J. Watson Research Center. Member of Sigma Xi and American Physical Society.

Archibald W. Smith

B.Sc. in Physics, University of Alberta, 1951; Ph.D., University of Toronto, 1955. Was engaged in research on ferromagnetism and optical masers at the Defense Research Telecommunications Establishment, Ottawa, 1956-1962. Joined IBM at the Thomas J. Watson Research Center in 1962, and is presently working on the modulation of light and on optical mixing in non-linear dielectrics.

Burton B. Tasini

B.Sc. in Engineering, 1955, University of London; M.S. in Electrical Engineering, 1957, Rice University. From 1955-1958 was computer engineer and programmer at the Shell Development Laboratory, Houston, Texas. Joined IBM Research Laboratory in 1958, worked on mathematical physics analyses and programming at the Research Computing Center; later did research on new computer systems and logical design. Is now at Advanced Systems Development Division, Yorktown Heights, N. Y. Is member of Sigma Xi, Society of Industrial and Applied Mathematics, Association for Computing Machinery, and Institute of Radio Engineers.

Harold S. Templeton

B.S. in Electrical Engineering, Union College, Schenectady, New York, 1951. Joined IBM in 1954 and has since been working in the area of tape transports and magnetic tape, Data Systems Division, Poughkeepsie. Member of Institute of Radio Engineers.

Marcel J. Vogel

B.S. in Chemistry, 1938, University of San Francisco. From 1945-1957, Vogel, Inc., worked in phosphor chemistry. Consultant to IBM on magnetic disk coating, 1956-1957. Since 1957, staff chemist at the IBM Research Laboratory at San Jose. Member of the American Chemical Society, Electrochemical Society, Scientific Research Society of America, and Illuminating Engineering Society.

Jack W. Wenner

B.S. in Electrical Engineering, 1954, University of Wisconsin. Joined IBM in 1956 and has since been working in magnetic tape drives and in magnetic tape analysis, Data Systems Division, Poughkeepsie. Member of Institute of Radio Engineers and American Institute of Electrical Engineers.

Shmuel Winograd

B.S. and M.S., 1959, in Electrical Engineering, Massachusetts Institute of Technology. Joined IBM in 1961 at the Thomas J. Watson Research Center. Is presently working on reliability problems in the automata and computability group.
